

Project Design Phase

Problem – Solution Fit Template

Date	30 June 2026
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Problem-Solution fit canvas 2.0		Purpose / Vision: Enable data-driven product placement decisions to maximize retail sales and customer satisfaction.	
Define CS, fit into CC 1. CUSTOMER SEGMENT(S) Who is your customer? i.e. working parents of 0-5 y.o. kids - Retail Store Managers - Business Analysts - Retail Business Owners - Merchandising Teams	CC 6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices. - Large volumes of sales data - Limited analytical skills / tools - Time constraints for manual analysis - Lack of interactive visual insights - Budget limitations for advanced tools	AS 5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking - Excel reports and spreadsheets - Manual analysis of sales data - Basic BI dashboards - Traditional reporting tools / methods	Explore AS, differentiate
Focus J&P, tap into BE, understand IC 2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides. - Increase product sales and profitability - Optimize product placement in stores - Understand customer buying behavior - Analyze impact of promotions and pricing - Make faster, data-driven business decisions	J&P 9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations. - Sales data is scattered across multiple sources - Manual analysis is time-consuming and error-prone - Lack of centralized visualization and real-time insights - Decisions are based on assumptions, not facts - Limited visibility into customer preferences and trends	RC 7. BEHAVIOUR What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace) - Review sales reports and spreadsheets - Compare historical sales and trends - Analyze top / low performing products - Experiment with product placements - Attend meetings and discuss with team	Focus on J&P, tap into BE, understand RC
Identify strong TR & EM 3. TRIGGERS What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. - Declining sales or low product performance - Seasonal demand changes - New promotions or competitor activities - Need for better customer satisfaction - Management's demand for performance insights	TR 10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour. An interactive Tableau dashboard that analyzes product placement, sales, pricing, promotions, and customer behavior. It provides real-time visual insights, KPI reports and trend analysis to help retail businesses make data-driven decisions for optimal product placement and increased profitability.	SL 8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 - Tableau Dashboard (Web) - Email Reports & Alerts - Business Analytics Portal 8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. - Team Meetings & Discussions - Store Visits & Evaluations - Printed Reports / Documents	CH 4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? i.e. lost, insecure > confident, in control - use it in your communication strategy & design. Before: Confused, Unsure, Overwhelmed, Frustrated After: Confident, Informed, In Control, Satisfied
