

Project Development Phase Dataset

Date	30 June 2026
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	2 Marks

Dataset Description

The dataset used for this project contains retail sales information collected from a retail store. It includes details about products, sales, pricing, promotions, customer demographics, and product placement. The dataset is analyzed using Tableau to identify factors that influence sales performance and customer purchasing behavior.

Dataset Source

Source: Kaggle Retail Sales Dataset

Reference link: <https://www.kaggle.com/datasets/amitykulkarni/impact-of-product-positioning-on-sales>

Dataset Format

CSV

Number of Records

1000 Rows

Number of Columns

15 Columns

Attribute Description

Attribute	Description
Product ID	Unique Product Identifier
Product Name	Name of Product

Attribute	Description
Category	Product Category
Product Placement	Shelf Position
Sales	Total Sales
Price	Product Price
Promotion	Promotion Status
Customer Age	Customer Age
Gender	Customer Gender
Region	Sales Region
Foot Traffic	Store Traffic
Season	Sales Season

Data Types

Column	Data Type
Product ID	String
Sales	Integer
Price	Float
Promotion	Boolean
Season	String

Data Cleaning

- ✓ Removed duplicate records
- ✓ Checked missing values
- ✓ Verified data types
- ✓ Renamed fields
- ✓ Formatted dates
- ✓ Removed unnecessary columns

Why was this dataset selected?

The dataset contains all the required information to analyze product placement, customer demographics, promotions, pricing, and sales performance. It provides sufficient attributes to build interactive dashboards and generate business insights using Tableau.

Limitations

- Dataset is static.
- No real-time updates.
- Limited customer information.
- Limited geographical coverage.
- Historical data only.

Conclusion

The dataset provides comprehensive retail sales information that supports effective analysis of product positioning and consumer behavior. It enables visualization of sales trends, comparison of product placement strategies, and generation of business recommendations using Tableau dashboards.
